Workshop Agenda

Develop rich application UI using SAP NW Cloud Portal and SAPUI5 libraries

- Configure development environment
- Get to know the events web app code
- Develop widgets for events application
- Deploy the widgets
- Design the application layout
- Change theming and branding
- Publish and consume the application

Open Social Overview

Goal

OpenSocial's goal is to make more apps available to more users, by providing a common API that can be used in many different contexts. I.e. web sites/containers.

Build of Materials

Developers can create applications, using standard JavaScript and HTML, that run on websites where OpenSocial APIs are implemented. These websites are known as OpenSocial containers.

Key concepts

OpenSocial provides a standard way for websites to expose their social graph and other social information and has evolved to be widely used as a component model also in social free enterprise context.

Terminology

1. **Widgets:** mini-applications that can be published to different OpenSocial-compliant providers. Working with a common API and framework means a developer has less to learn in order to build multiple websites. Widgets are portable, allow for personalization and individual user preferences.

2. **Container:** Where the widgets are run, it is typically represented as a web page, but alternative forms are also capable of displaying a widget.

3. **View:** A presentation mode for a widget.

Terminology cont.

- 4. User Preferences:** These represent configuration values for a User of the widget. These are key/value pairs that form the basis of widget configuration and persistence.
- 5. Feature:** A library or behavior that is provided by the Container. widget features are the primary extensibility mechanism employed by widgets. They often direct a widget server to make new JavaScript APIs available to rendering code, but may also manipulate the widget's contents, for example to add extended syntax.
- 6. Widget Specification XML:** this is the XML document that contains all the Metadata, Features, Message Bundles, User Preferences, and Content necessary to display a widget to an end user.

SpecXML example

```
<?xml version="1.0" encoding="UTF-8" ?>
<Module>
  <ModulePrefs
    title="Setprefs New">
    <Require feature="opensocial-0.9"/>
    <Require feature="setprefs" />
  </ModulePrefs>
  <UserPref
    name="counter"
    datatype="hidden"/>
  <Content type="html">
    <![CDATA[
      <div id="content_div" style="height: 100px;"></div>
      <script type="text/javascript">

        // Get user preferences
        var prefs = new gadgets.Prefs();
        var html = "";
        var div = document.getElementById('content_div');
        // Increment value of "counter" user preference
        function incrementCounter() {
          var count = prefs.getInt("counter");
          div.innerHTML = "The count is " + count + ".";
          // Increment "counter" userpref
          prefs.set("counter", count + 1);
        }

        // Reset value of "counter" userpref to 0
        function resetCounter() {
          prefs.set("counter", 0);
          div.innerHTML = "Count reset to " + prefs.getInt("counter") + ".";
        }

      </script>
      <input type="button" value="Count" name="count" onClick="incrementCounter()">
      <input type="button" value="Reset" name="reset" onClick="resetCounter()">
    ]]>
  </Content>
</Module>
```

Events Application

Functionality Overview

- Schedule an event with dates
- Select a specific venue for the event
- Assign participants to the event

The screenshot shows the SAP Events On-Demand interface for managing event venues. The page title is "Event Venues" and the user is logged in as "Welcome Sajjad Ahmed". The interface includes a navigation bar with "Events" and "My Team" links. Below the navigation bar, there are buttons for "Create", "Modify", "Delete", and "Reload". The main content area displays a table of event venues with columns for Name, Street, City, State, and Zip Code.

Name	Street	City	State	Zip Code
Orange County Convention Center	9800 International Drive	Orlando	FL	032819
San Jose Convention Center	50 West San Carlos Street	San Jose	CA	095110
The Venetian	3325 Las Vegas Boulevard South	Las Vegas	NV	089109

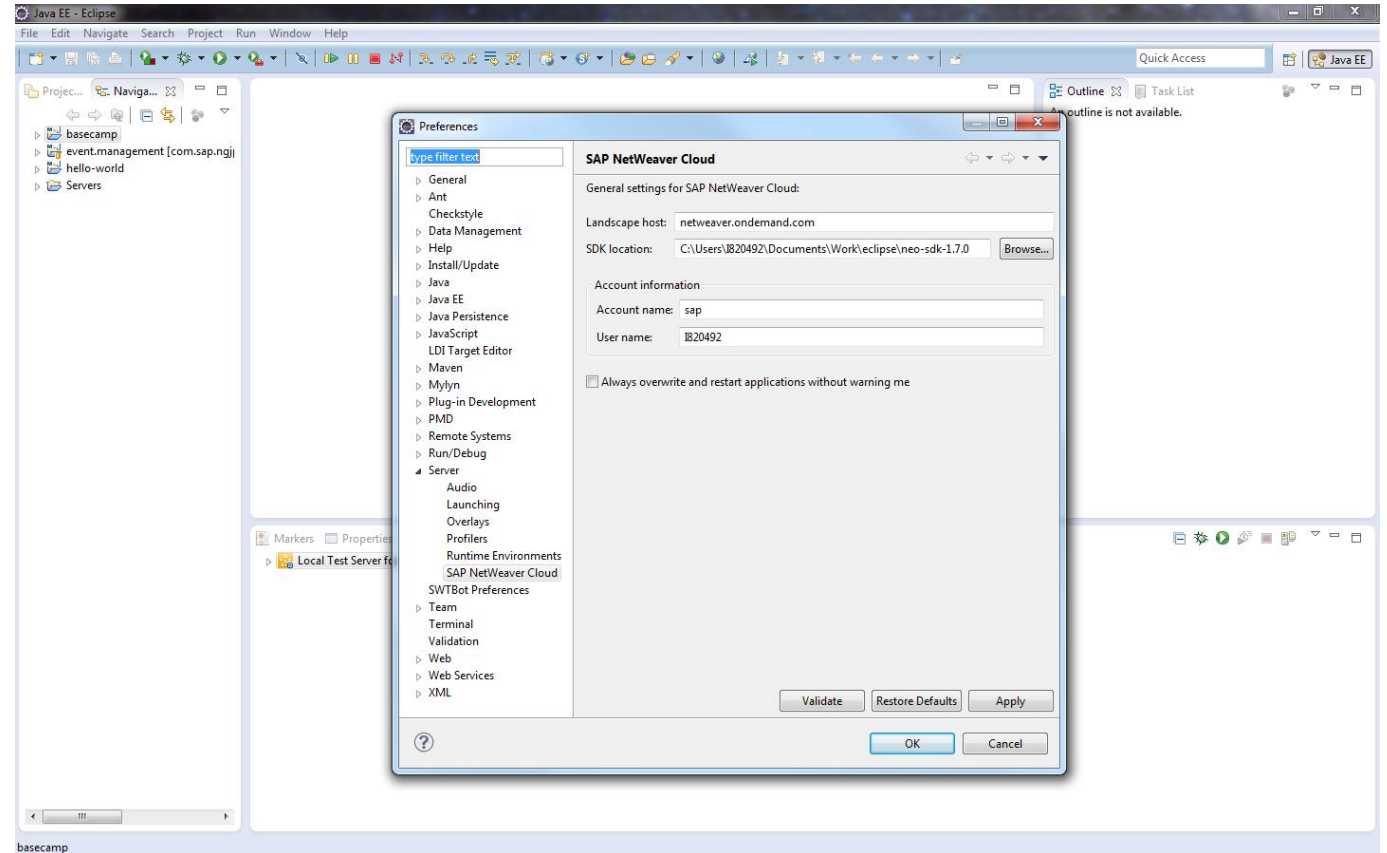

Exercise 1 - Configure Development Environment

Start Eclipse and verify settings

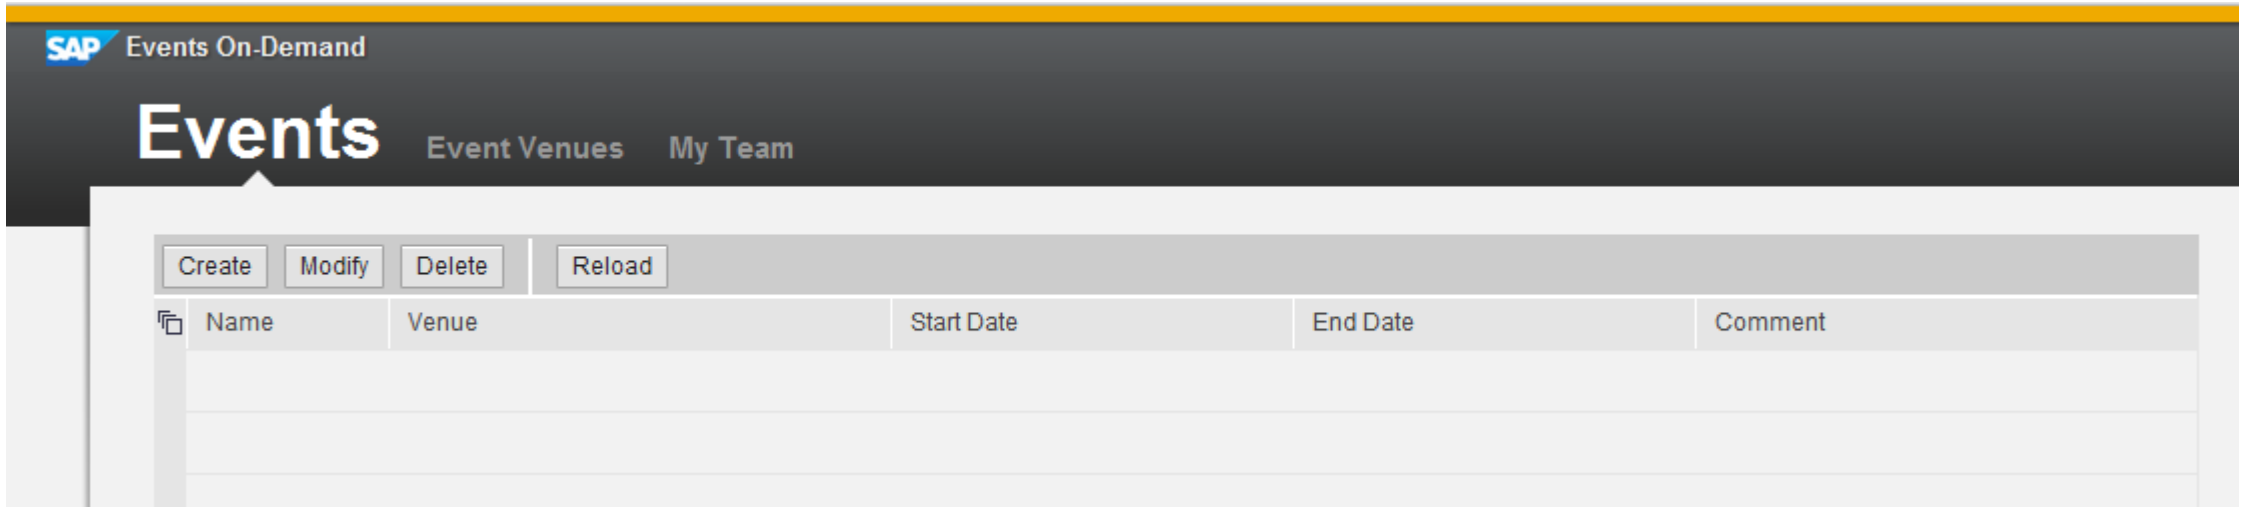

- Proxy
- Target Runtime
- NW Cloud Server

Load the Events Management Project

- From `\\fairfile.fair.sap.corp\session\CD360`

Exercise 2 – Widgetize the Events Section with UI5 controls

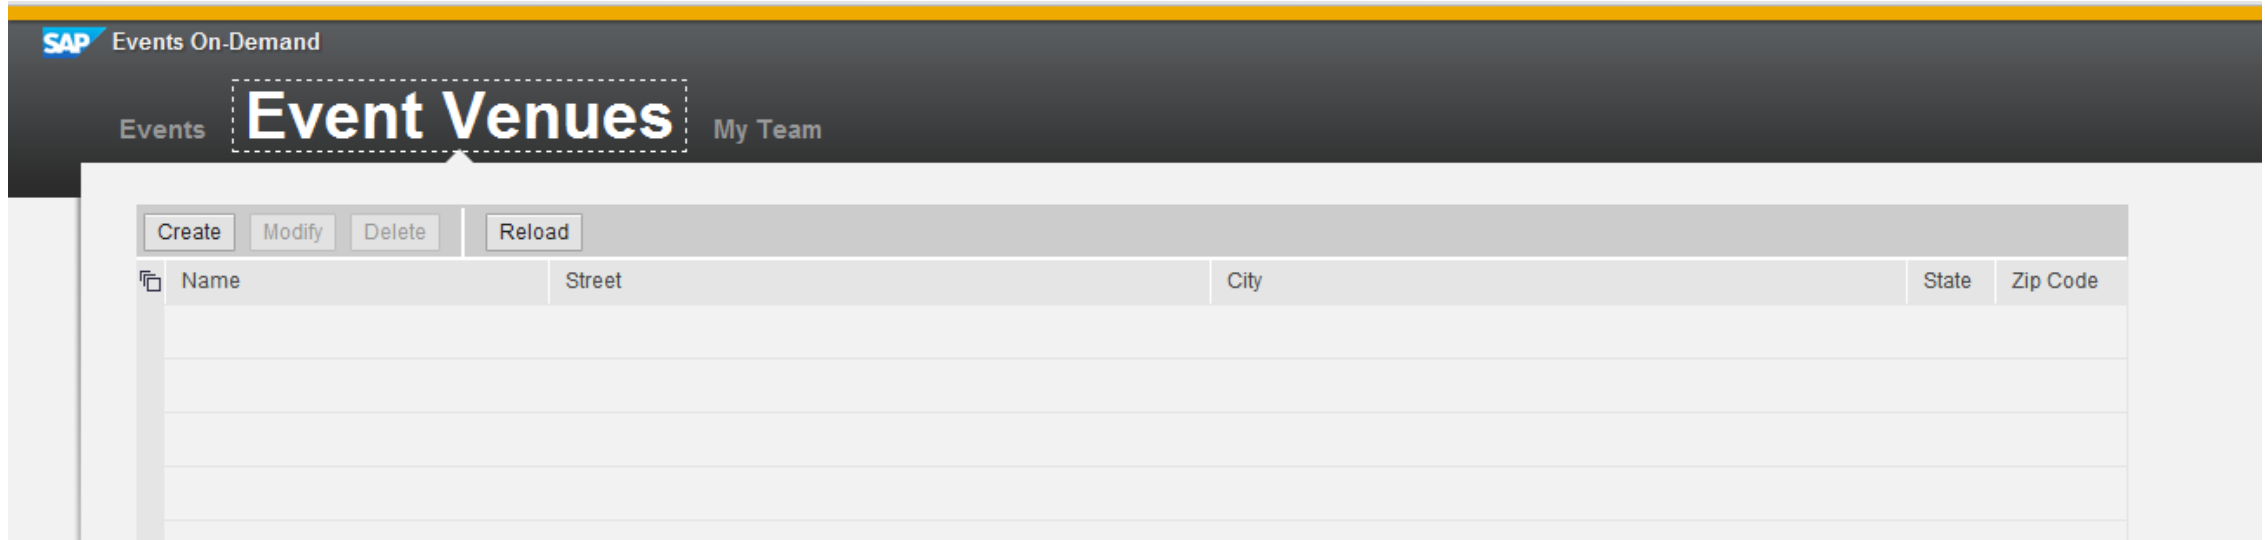

Events Table Widget

Participants Widget

Events Location Map Widget

Exercise 3 – Widgetize the Event Venues Section with UI5 controls

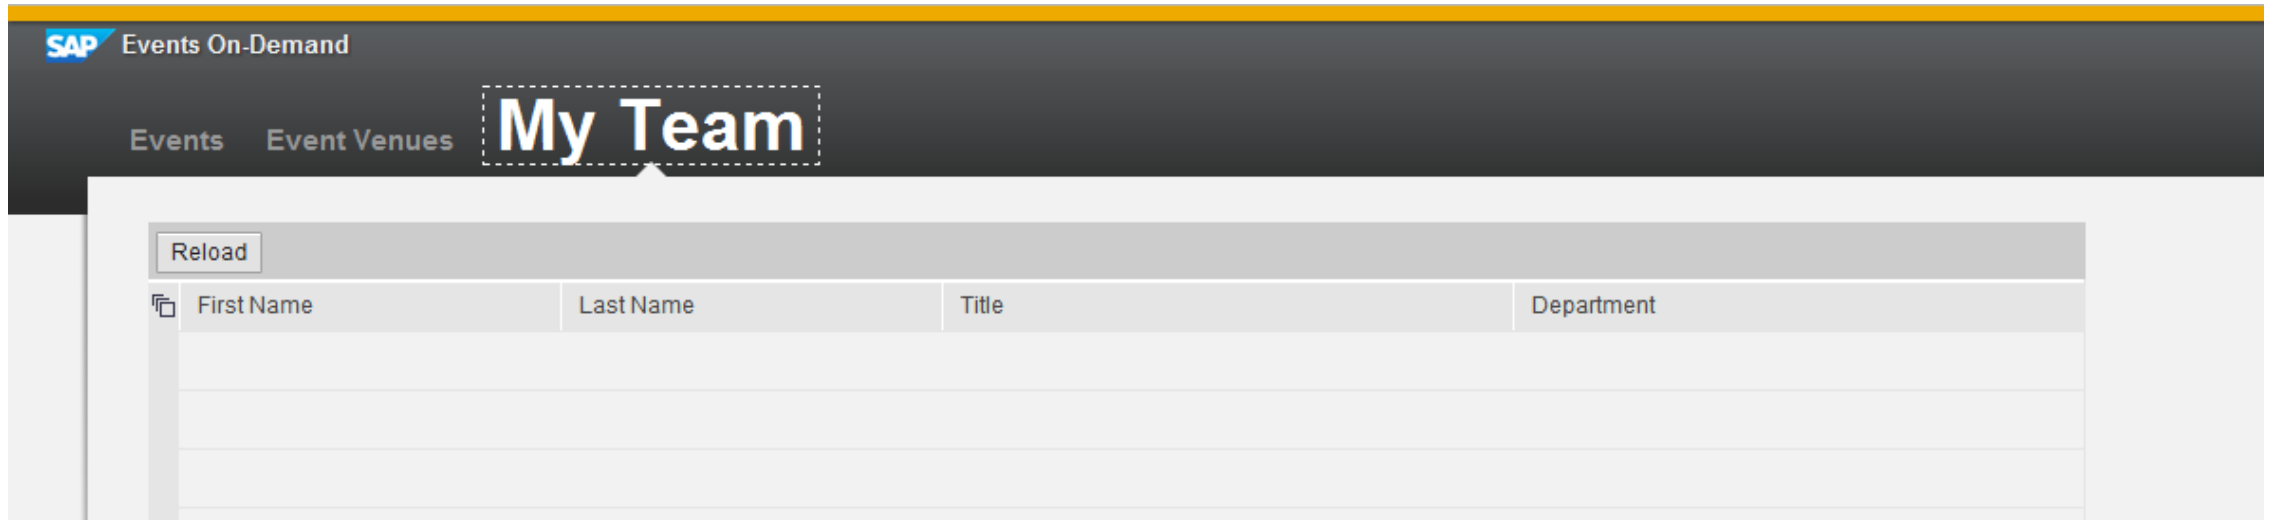

*Events Venues Data Widget
Table + Map View*

Events Map Widget

Toggle Map Display

Exercise 4 – Widgetize the My Team Section with UI5 controls

Team Table Widget

Person Details Widget

Exercise 5 – Add Cloud Portal Open Social Features

Context

- Events Section
- Event Venues Section
- My Team Section

Widget Menu

- Event Venues Widget

Personalization

Exercise 6 – Deploy the Widgets to NW Cloud and expose in NW Cloud Portal

The screenshot displays the SAP NetWeaver Cloud Portal interface. The top navigation bar includes 'SITE DIRECTORY', 'CONTENT', 'THEMES', and 'ROLES'. The main content area is titled 'Generic Widgets' and contains a table of 'Widgets Available in Content Catalog'. An 'Add Widget' modal window is overlaid on the table, providing a form to add a new widget.

Name	Description	Categories
ghtru	tutru	uyty
Generic OS widgetdddddddddddddd	Generic OS widget	Generic Provider Test
AAA		
YNET	YNET?	News
YNET	YNET?	News

Add Widget

*Type: URL

*Name: _____

Description: _____

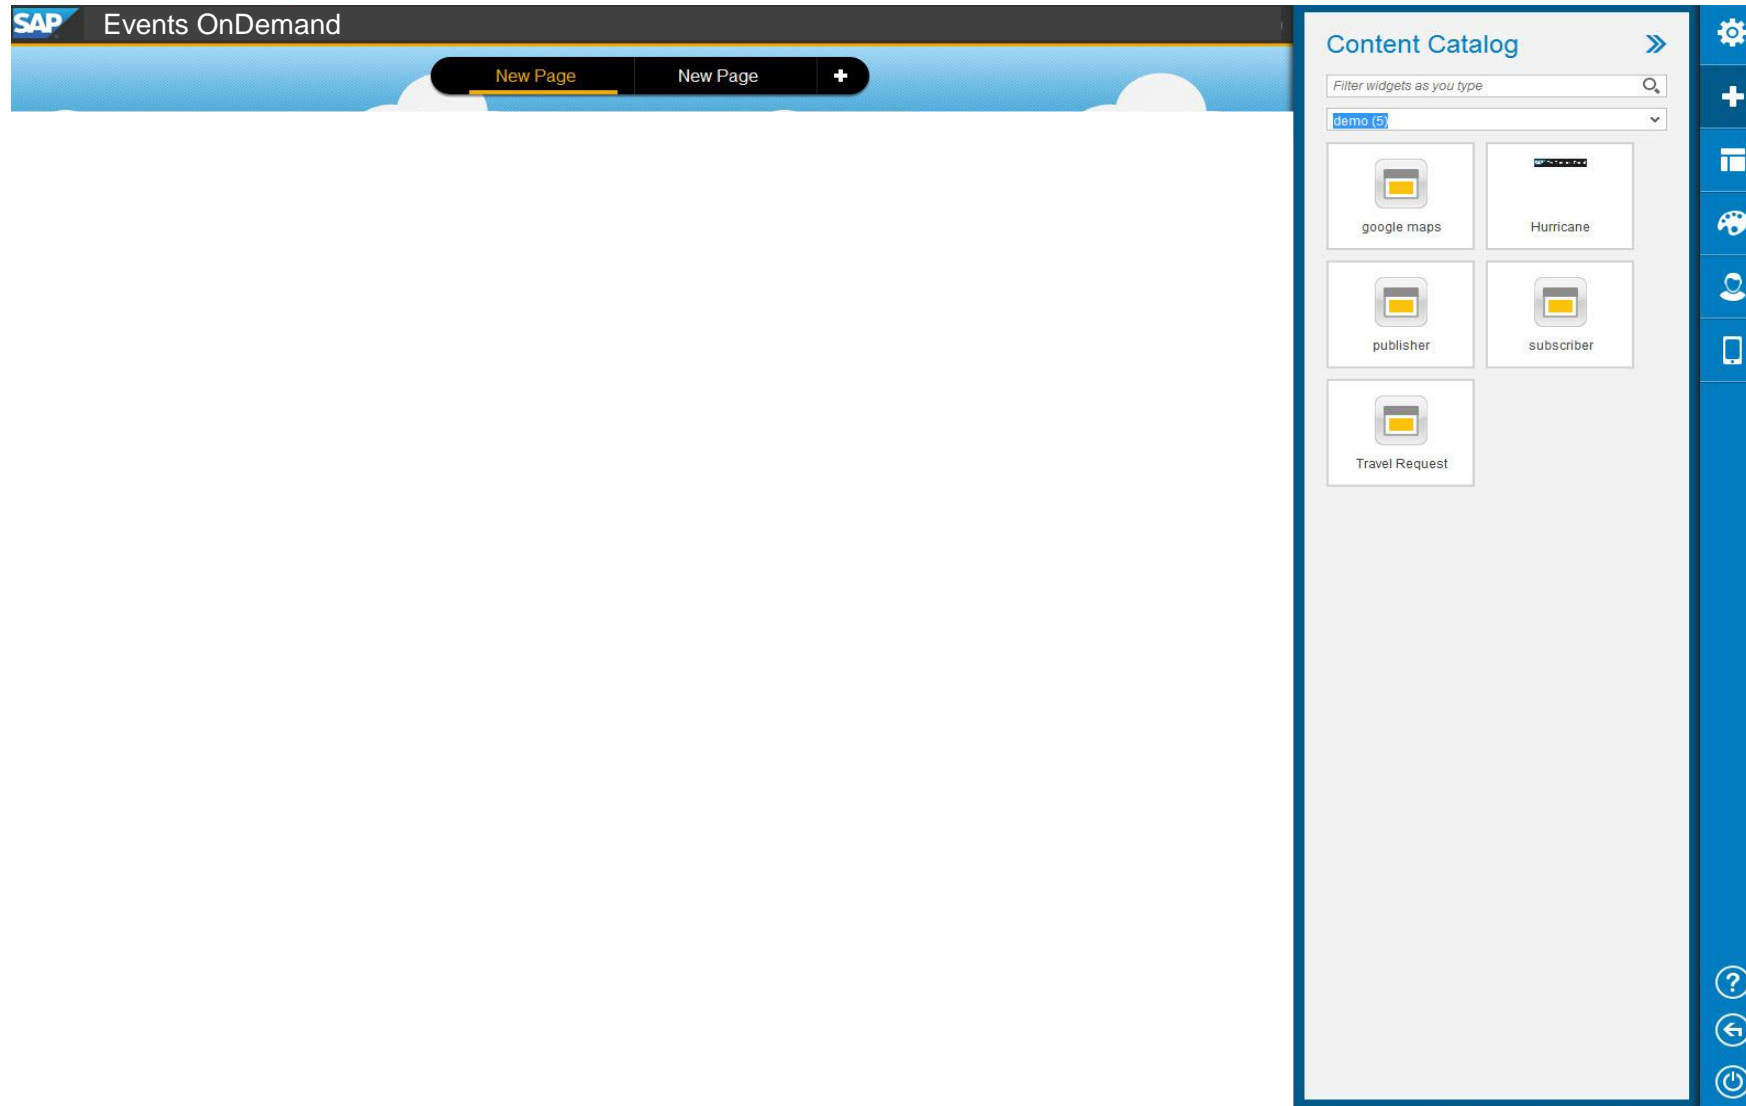

Icon (gif, jpg, png): _____ Browse...

Categories: _____

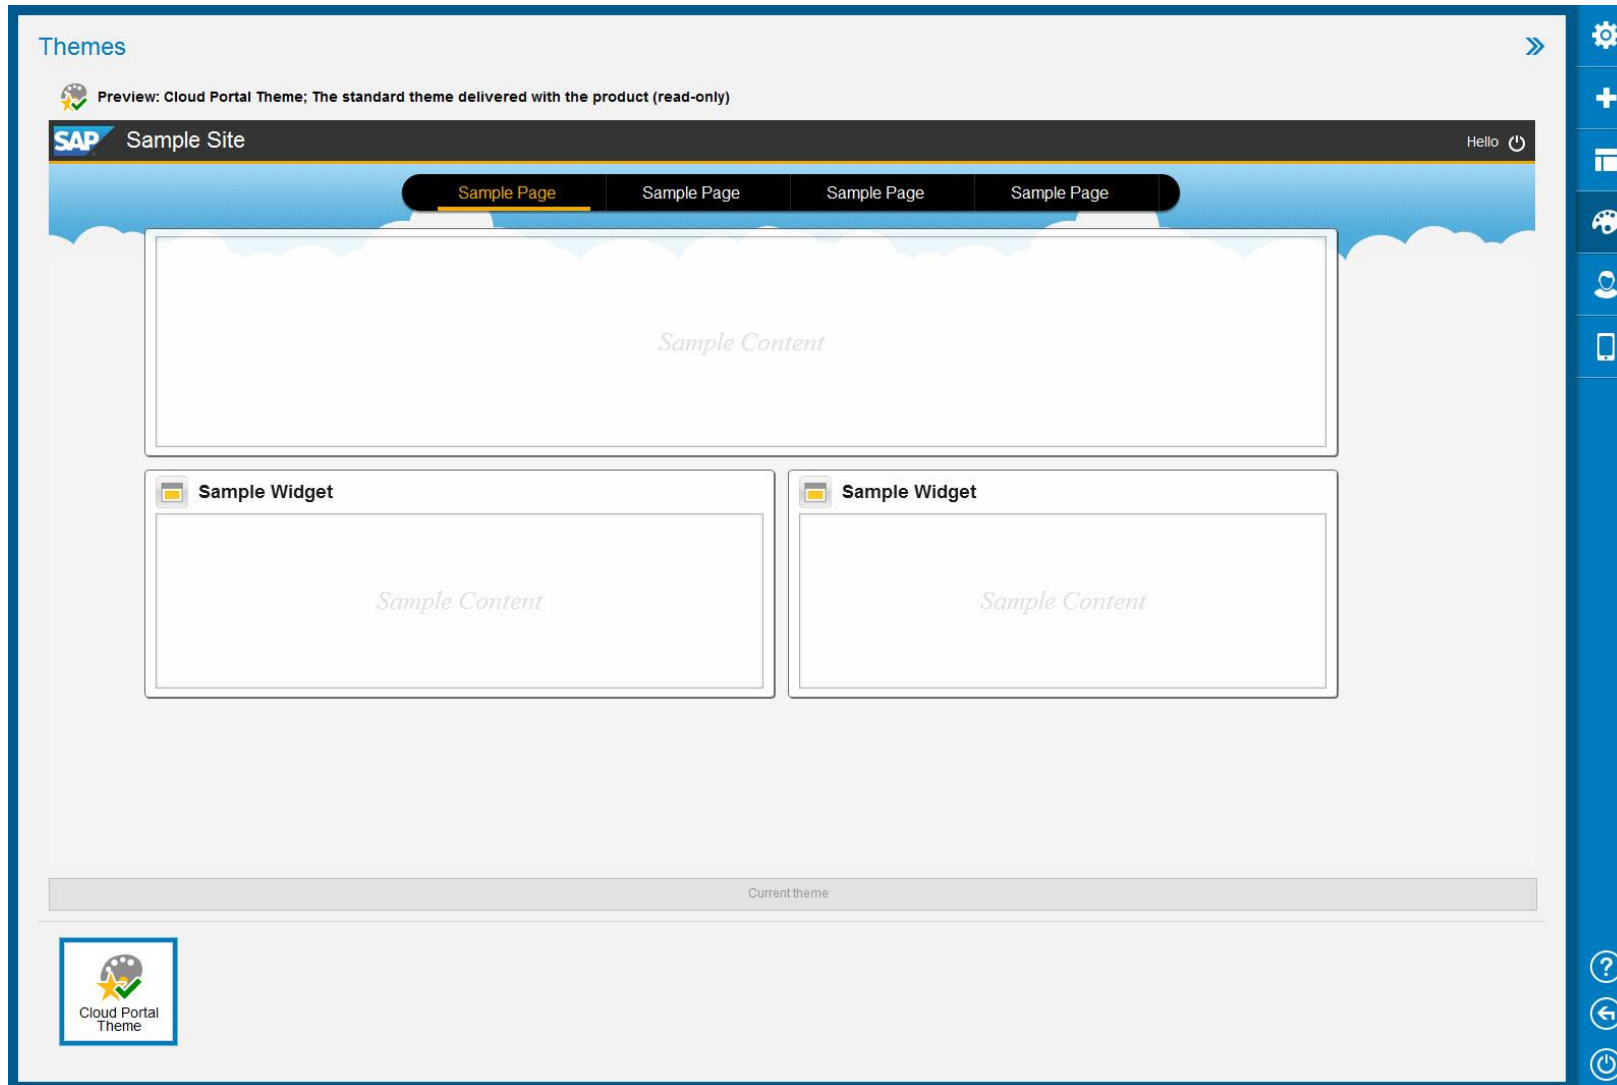

*URL: _____

Save Cancel

Exercise 7 – Authoring the Application Site

Exercise 8 – Theming and Branding the Site

Exercise 9 – Publishing the Site

The screenshot shows the SAP Events OnDemand interface. At the top, there is a header with the SAP logo and the text "Events OnDemand". Below the header, there are two buttons labeled "New Page" and a plus sign. The main content area is a large, empty white space with a decorative blue and white cloud pattern at the top. On the right side, there is a vertical settings panel titled "Settings" with a right-pointing arrow. The panel contains the following information:

- Events OnDemand** (with a green up arrow icon)
- Site URL**: <https://serverdv10dp-odtenant1.prod.paas.sapbydesign.com/portal/cloud-portal/index.html?id=b5299d38-0bef-4ad6-9e11-27afa8386f3a&mode=consumption>
Edit Site Name in URL
- Access User Site**:
 - Go to user site
 - Display QR code
- Date Created**: 25.07.2012 19:21
- Last Published**: Yaron Ganor, 23.08.2012 09:16
- Last Modified**: Ram Alon, 27.08.2012 12:55
- Site Status**: Published (with a green up arrow icon)

At the bottom of the settings panel, there are three buttons:

- Revert to Last Published Site
- Take Offline
- Publish

On the far right, there is a vertical toolbar with icons for settings, home, palette, user, mobile, help, back, and power.
