# Agenda

---

**SAP NetWeaver Cloud Integration**

**Required capabilities on the Cloud**

**Experience for customers**

**Demo**

**Next Steps**

# Agenda

---

## **SAP NetWeaver Cloud Integration**

Required capabilities on the Cloud

Experience for customers

Demo

Next Steps

# SAP NetWeaver Cloud Integration

## SAP NetWeaver Cloud Integration

- Integration service running on SAP NetWeaver Cloud
- Core Runtime for processing, transformation, and routing of messages
- Out-of-the-box connectivity support (WSRM, IDOC, sFTP, etc)
- Eclipse based design time capabilities
- Embedded Operations cockpit for monitoring and administration

## Packaged Integration

- Packaged integration for SAP to SAP (partly via RDS)
- Partner ecosystem to build integration content for Non-SAP
- Compatibility of message mappings (can be deployed on both SAP NetWeaver Cloud Integration and SAP NetWeaver PI on-premise)

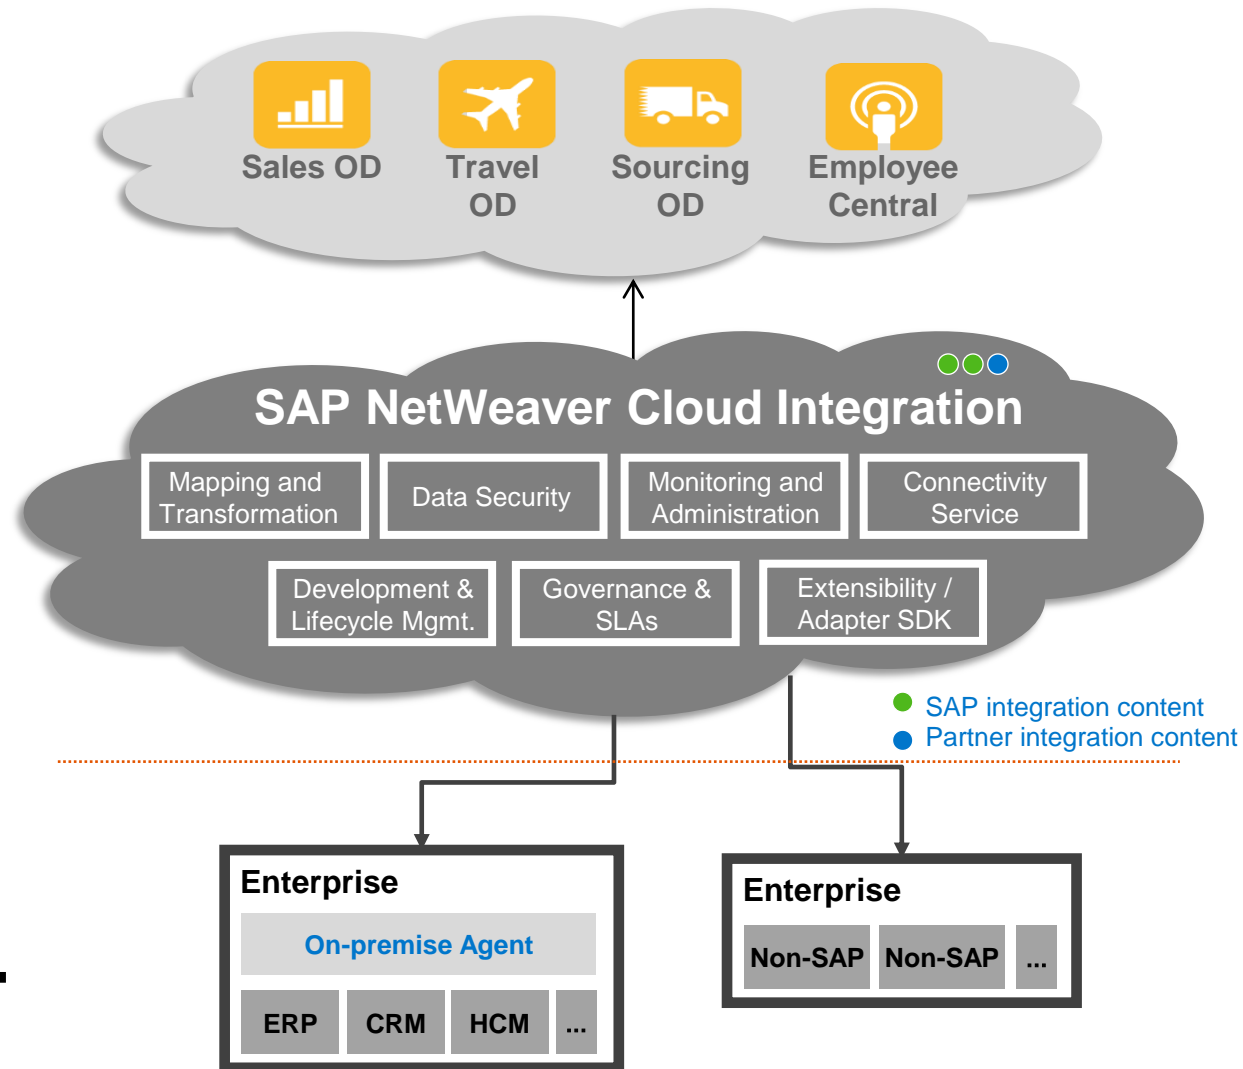

## Application Scenarios

- Sales OD ↔ CRM OP
- Financial Services Network
- SFSF BizX OD ↔ HCM OP
- SFSF EC OD ↔ ERP OP

Legend: OD = on-demand / op = on-premise / EC = Employee Central / ByD = Business By Design / PI = Process Integration

SAP Cloud

On premise

# Agenda

---

SAP NetWeaver Cloud Integration

**Required capabilities on the Cloud**

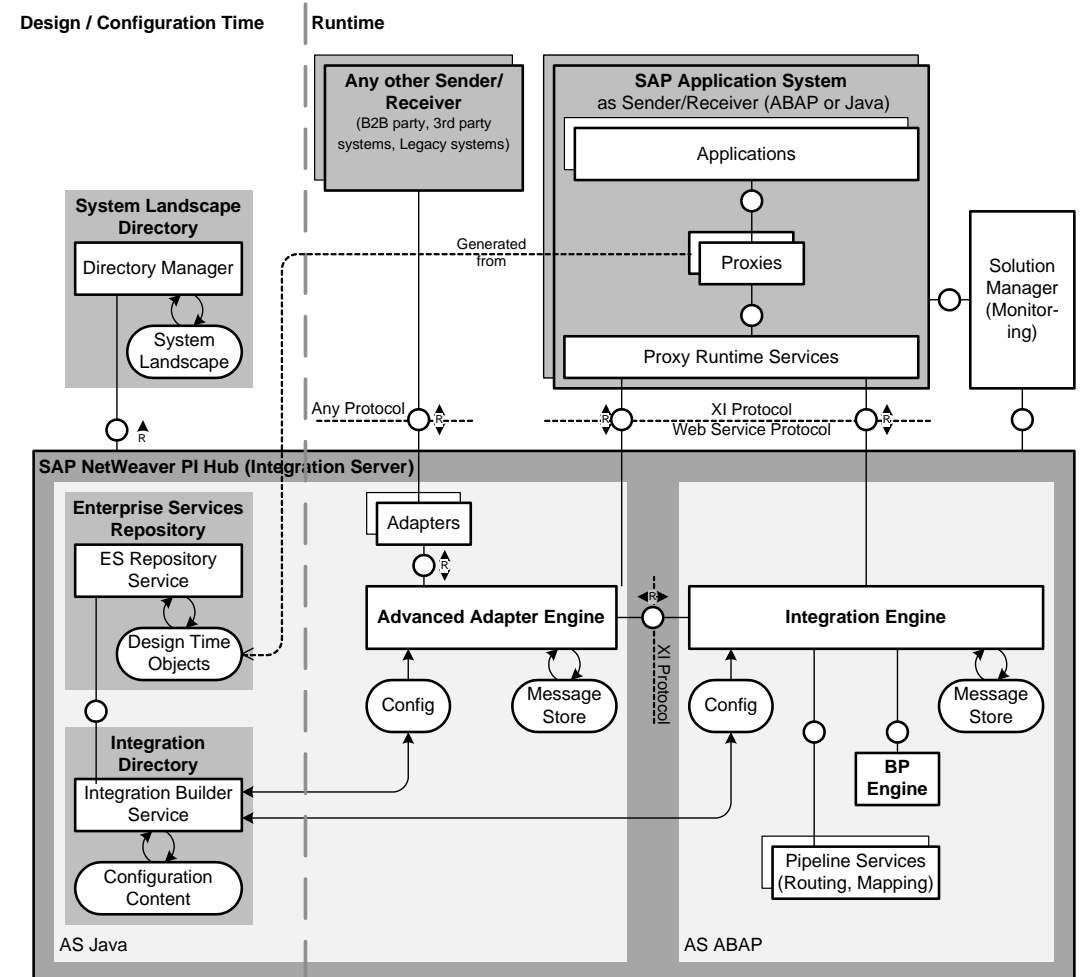

Experience for customers

Demo

Next Steps

# Why is the current integration technology not Cloudy

1. Implemented as single tenant solution
  2. No further TCO optimization beyond single stack possible
  3. Dependencies to other on Premise systems (e.g. SAP Solution Manager)
  4. Optimized for A2A and recently also B2B
  5. Architecture not based on virtualization
- ⇒ Not suitable for multi-tenant, virtualized cloud environments
- ⇒ New architecture approach

# Required Changes for Cloud Infrastructures (\*)

## Top-6 Challenges:

1. Costs
2. Lightweight/Performance
3. Scalability
4. Multi-Tenant
5. (Regional) Distribution
6. Advanced Security

## Engineering Responses:

1. Optimize operation costs
2. Small Java Runtime
3. Virtualization Awareness
4. Runtime isolation and data partitioning
5. Distributed, heterogeneous cluster
6. SSL mutual client/server certificates, payload related security features

(\*) For private cloud technologies as well as SAP Cloud

# Agenda

---

SAP NetWeaver Cloud Integration

Required capabilities on the Cloud

**Experience for customers**

Demo

Next Steps

# Experience for customers

---

- **Service is always up and running and scales (no IT ops) – so SLAs will be critical!**
- **Integration at ,cloud speed‘ – from weeks/months to hours/days**
- **No coding!!!**
- **No time and material projects to deal with integration but a fixed price end result guaranteed service**
- **Customers can consume Cloud applications in a very granular way following their business needs**
- **Enabling the ecosystem will be critical**

# What are the SLAs for SAP NetWeaver Cloud Integration?

---

- **Availability**
  - Service availability
  - Message processing capabilities will be available 24 hrs a day, 7 days a week, 365 days in a year
- **Message Transfer Protocol**
  - 100% no data loss
  - for example: Asynchronous "at least once" via WS-RM over https and sFTP
- **Optimized Maximum message processing time**
- **Performance optimized for the scenario**
- **Security**
  - Access control & audit logs supporting ISO27001 and legal terms & conditions
- **Auditing log**
  - No message processing, no system change, and no artifact change without log creation

# Security is a key decision criteria for CIOs!

---

➤ **Only registered users via SAP Cloud Professional Services can leverage the service**

➤ **Security @ multiple levels – Transport, message and payload**

One https URL per tenant which is secured at different levels, Authentication and authorization @ runtime via

➤ X.509 certificates for WSRM over https

➤ sFTP via exchange of public and private keys

**Encryption/Decryption and signing of messages at runtime**

➤ Authentication and authorization @ runtime PKCS7, PGP , XML DigSig

➤ Payload validation planned @ runtime

➤ **Multitenancy supported at all levels**

➤ **Logging of all actions (failed inbound authorization, config changes and deployment of nodes), audit trails**

➤ **Archival of messages – no usage of OS for archiving, avoid unencrypted storage of confidential data**

➤ **ISO 27001 and SAS 70 type certifications planned**

# Agenda

---

SAP NetWeaver Cloud Integration

Required capabilities on the Cloud

Experience for customers

**Demo**

Next Steps

# Personas and Tools

SAP NetWeaver Cloud Integration

# SAP NetWeaver Cloud Integration Services

## Target Personas (1)

---

### Customer Side

- **Tenant admin**  
configure backend systems (e. g. install and configure FSN Corporate Agent, configure sFTP connectivity, upload and download of communication information, such as WSDLs, certificates, directory and file name, polling interval)
- **LOB user**  
trigger updates in business scenarios (e. g. payment requests, business partner updates etc.) -> which in turn triggers a message exchange to SAP NetWeaver Cloud Integration

# SAP NetWeaver Cloud Integration Services

## Target Personas (2)

---

### SAP

- **SAP Cloud Professional Services aka Developer**  
support customer extension scenarios i.e. create integration flows, build mappings, generate configuration bundles
- **SAP Cloud Managed Services aka SaaS admin**  
create tenants, start nodes, deploy right configuration bundle and certificates to corresponding node, react on alerts on SPC (Service Provider Cockpit), drive software updates, message monitoring
- **SAP Application Content developer**  
create standard integration content which includes creation of APIs and mappings, e. g. from SoD to CRM 7.0

# Initial provisioning of Tenant by SAP Cloud Managed Services

---

Dear Tenant Owner, Please find enclosed in this email the details of your SAP NetWeaver Integration OnDemand Tenant.

Requested via-

**Tenant Owner:** Ankur Bhatt

**Tenant Purpose** Dry run

**Operations server URL:** <https://nmdravatarprod-central.netweaver.ondemand.com>

**Worker Node URL:** <https://iflmaphko007dravatarprodhko007.intaas.netweaver.ondemand.com/cxf>

For access, please use SCN credentials [www.scn.sap.com](http://www.scn.sap.com)

**Project link** <https://projectportal.wdf.sap.corp/projects/dryrun>

Access enabled for all participants in dry run.

**ESR** <http://vmw5464.wdf.sap.corp:50100/dir/start/index.jsp>

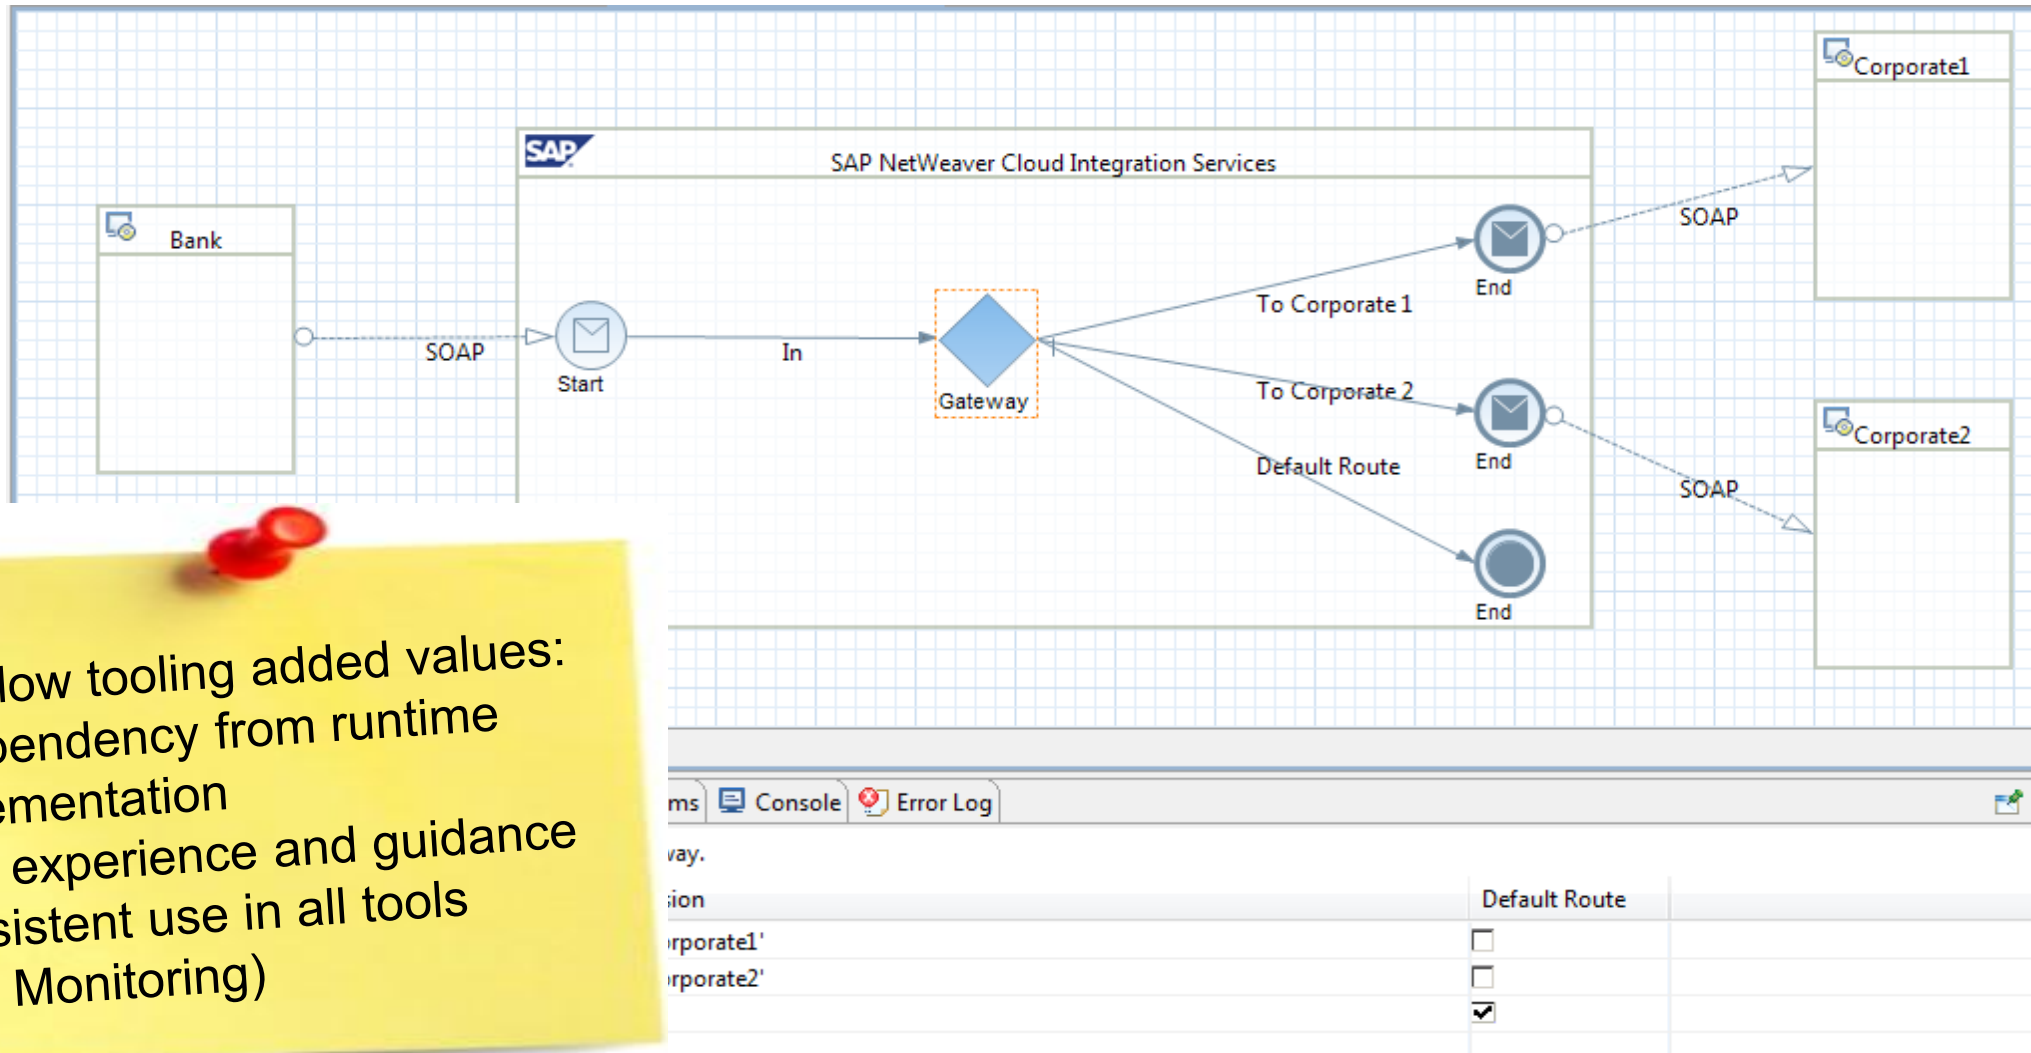

User Name: PIADMIN

# Tooling for SAP Cloud Professional Services / Integration Developer

## Eclipse based iFlow Modeling

- SAP iFlow tooling added values:
1. Independency from runtime implementation
  2. User experience and guidance
  3. Consistent use in all tools (e.g. Monitoring)

# Tooling for SAP Cloud Managed Services / SaaS Admin

Eclipse based Operations UI for Tenant administration, message monitoring and alert configuration
