NEW SAP NETWEAVER CLOUD PORTAL IN ACTION

PMC266

Exercises / Solutions

Maya Kidron, Vitaly Vainer / SAP

The Best-Run Businesses Run SAP™

Introduction

Welcome

Welcome to the administrator and author hands-on workshop for SAP NetWeaver Cloud portal. Over the next two hours, you will author sites, apply themes, manage content and users and experience immediate results of your work. After this session, you will be equipped with the knowledge and skills to quickly author and administer your own sites using NetWeaver Cloud Portal.

Workshop Agenda

This workshop is structured into 7 exercises, as follows:

1. ADD NEW WIDGETS

In this exercise you, as a tenant administrator, will learn how to manage available widgets in the content catalog available to the site authors.

2. DEFINE CLOUD PORTAL USERS

In this exercise you, as a tenant operator, will learn how to assign users to the global cloud portal roles.

3. AUTHOR SITE

In this exercise you, as a site creator and site author, will learn how to create and author new site

4. CONFIGURE AND PUBLISH THE SITE

In this exercise you, as a site author, will learn how to configure and publish the site to the end users.

5. USE ADVANCED AUTHORIZING FEATURES

In this exercise you, as a site author, will learn how to make one-pager sites, alternate widget configuration for device consumption, preview with tablet view.

6. MANAGE THEMES

In this exercise you, as a site author, will learn how to apply themes to the site to alternate its visual properties. You will also learn, as a tenant administrator, how to change default theme.

7. USE ADVANCED SITE MANAGEMENT CAPABILITIES

In this exercise you, as a site author, will learn how to manage site lifecycle, including revert site to last published, take the site off and remove site.

TERMINOLOGY

Account

An entity of SAP NetWeaver Cloud where customers may develop their own apps and connect to other apps and services like SAP NetWeaver Cloud Portal

Tenant	Entity under account where applications are assigned and configuration is stored
Application	Web application running on NetWeaver Cloud. Can be application developed by customer within customer's account or application provided by SAP or 3 rd party vendor. Application is assigned to the tenant
Site Creator role	User assigned to this role may create sites
Cloud Portal Administrator role	Users assigned to this role may assign roles to other users, manage widgets and themes, create and author all sites
Site Owner role	This role is per site and allows assigned users to manage particular site
Site End User	This role is per site and allows assigned users to use the site
Widget	Open Social or URL based component in Content Catalog and on the site
Content Catalog	Repository and UI component where site owner can find content and add to his site
Theme	CSS file that can be uploaded by portal administrator and selected by site author, which allows to control visual representation of the site

PREREQUISITES

System and user	On your desk you will find a note with your account name, tenant name, user name and password. This information will allow you to log in into your SAP NetWeaver Cloud Portal account.
Additional materials for the exercises	<ul style="list-style-type: none"> • Download PDF file: • Go to the following URL: http://tiny.cc/PMC266 • Look for the document on the lower part of the page. • Right click the document, choose "save as" and save it on your desktop • Look for one of the images on the top. • Right click it, choose "save as" and save it on your desktop
Log on	<p>Open the browser. And go to <a href="https://<your account>-<tenant>.netweaver.ondemand.com/portal/index.html">https://<your account>-<tenant>.netweaver.ondemand.com/portal/index.html</p> <p>On the SDN login screen sign on with the given credentials</p>

EXERCISE 1: ADD NEW WIDGETS

Navigate to Content tab	1. Click on Content tab
Add URL widget	<p>2. Click on  button</p> <p>3. In the Add dialog enter the following:</p> <ul style="list-style-type: none"> • Type: choose URL • Name: SAP Homepage • Description: <free text> • Categories: Websites

- URL: <http://www.sap.com/solutions/technology/cloud/index.epx>

4. Click Save

**Add OpenSocial
widgets**

5. Click on **+ Add Widget** button

6. In the Add dialog enter the following:

- Type: choose OpenSocial
- Name: Publisher
- Description: <free text>
- Categories: Open Social
- URL: Base/xml/GooglePub.xml

7. Click Save

8. Click on **+ Add Widget** button

9. In the Add dialog enter the following:

- Type: choose OpenSocial
- Name: Bing Search
- Description: <free text>
- Categories: Open Social
- URL: Base/xml/BingSearchSub.xml

10. Click Save

11. Click on **+ Add Widget** button

12. In the Add dialog enter the following:

- Type: choose OpenSocial
- Name: Google maps
- Description: <free text>
- Categories: Open Social
- URL: Base/xml/GoogleMapsSub.xml

13. Click Save

EXERCISE 2: DEFINE CLOUD PORTAL USERS

**Navigate to Roles
tab**

14. Click on Roles tab

Add Admin assignment

15. Click on  **Add Assignment** button
16. In the Add dialog enter the following:
 - First Name: David
 - Last Name: karr
 - User ID: P1170659
 - Email: David.karr@email.com
 - Role: choose Administrator
17. Click Save

Add Creator assignment

18. Click on  **Add Assignment** button
19. In the Add dialog enter the following:
 - First Name: Susan
 - Last Name: Jones
 - User ID: P1170662
 - Email: Susan.Jones@email.com
 - Role: choose Creator
20. Click Save

EXERCISE 3: AUTHOR SITE

Navigate to Site Directory tab

21. Click on Site Directory tab

Create new site

22. Click on  **New Site** button.
23. In the New Site dialog enter the following:
 - Site name: My First Cloud site
 - Description: <free text>
24. Click “Create and Open” button

Create a Site in 10 Easy Steps

25. In the new created site, read the Tip popup to guide you how to create a Site.
26. When finishing close it by clicking the  button – top right corner.

Rename page

27. In the pages bar  double click the default page name
28. The name is now editable, change it to be: “Welcome”
29. Click Enter to apply changes.

Open Content catalog

30. Click the  in the site authoring panel (blue strip on the right) to open content catalog

Add Document widget to the page

31. In the opened content catalog filter “doc” in the filter field 
 32. Choose “Document Widget” and double click it in order to add it to the current page.
-

Upload Document	33.	In the Document widget click Upload Document button
	34.	In the file selection window choose the .pdf file you previously downloaded to upload
	35.	Click Open (in the file selection window).
Add Image widget to the page	36.	In the content catalog: Clear the filter field by hitting the  button inside the field
	37.	Filter “image” in the filter field
	38.	Choose “Image widget”, drag it into the page and drop wherever you would like.
Upload Image	39.	In the Image widget click Upload Image button
	40.	In the file selection window choose image file you previously downloaded to upload.
	41.	Click Open (in the file selection window).
Add SAP Homepage widget to page	42.	In the content catalog: Clear the filter field by hitting the  button inside the field
	43.	In the categories drop down list choose “Websites” category
	44.	Double click the SAP homepage widget (in order to add it to the page)
Add group widget	45.	In the content catalog: within the same filter (Templates category) choose the group widget and double click it to add it to the page.
Rename the Group widget	46.	Hover over the group widget frame
	47.	Select the settings button 
	48.	Choose the Rename option and change the group name to be: “ Documents”
	49.	Press Enter to apply changes
Close the content catalog panel	50.	In the content catalog panel click on the blue arrow at the top  (close panel button)
Insert Widgets to Group	51.	In order to add widget to the group, drag it and drop it in inside the group.
	52.	Add all the widgets on page to the group – “Documents”
Change group view	53.	Hover over “Documents” widget select the view icon  : the most left icon out of the 3 presented icons.
	54.	Choose Navigation Bar mode
Change widget size	55.	Hover over bottom-right corner  of the “Documents” widget until “resize” mouse cursor appears, click and resize the widget to the full page

Add new page	56.	In pages bar click on the  sign.
	57.	Set name for the new added page: "Search", press Enter to apply changes.
Open Content catalog	58.	Click the catalog icon  in the site authoring panel
Add open social widgets	59.	In the categories drop down list choose "Open Social" category.
	60.	Add all the 3 widgets in this category to the page by double click / drag and drop.
	61.	Organize widgets on the page, so "Publisher" is in the top left corner, "Google maps" takes most of place on the right and Bing Search is below

EXERCISE 4: CONFIGURE AND PUBLISH THE SITE

Edit site settings	62.	Click on the Settings icon  in the site authoring panel – blue strip at the right.
	63.	In the settings panel double click the site name and change its name to be: "My First Cloud Site 2012"
Edit Site name in URL	64.	Still in the Settings panel click the "Edit Site Name in URL" button.
	65.	Change the URL suffix to be: "MySite"
	66.	Click on the  to apply the changes
Invite Users to site	67.	Click on Manage users icon  in the site authoring panel
	68.	In the opened window click  Invite Users button
	69.	In the invite users dialog add any Email address to send the invitation.
	70.	Insert any text to the invitation
	71.	Click Send
		<i>Note: user will not get the invitation until you will publish the site.</i>
Publish Site	72.	Click on the Settings icon  in the authoring panel
	73.	Click the Publish button at the bottom of the panel.
	74.	Approve publishing the site in the confirmation dialog.
	75.	Close the dialog says the site is now published.
	View site in Consumption	76.
<i>Note: only published sites have this ability.</i>		
77.		See the created site in consumption (navigate between pages, maximize widgets etc').
	78.	Go to the "Search" page, in the "Publisher" widget enter Name: SAP TechEd, Location: Las Vegas and click Enter. Check behavior of other widgets.

EXERCISE 5: USE ADVANCED AUTHORIZING FEATURES

Back to Site directory	79.	Go back to the previous tab (the site in authoring mode)
	80.	Click the arrow icon  at the bottom of the site Authoring panel, in order to go to site directory.
Create Mobile site	81.	Navigate to Site directory tab, click on + New Site button.
	82.	In the New Site dialog enter the following: <ul style="list-style-type: none">• Site name: One Pager• Description: <free text>
	83.	Click “Create and Open” button
Add URL widget	84.	Close the how to create site dialog
	85.	Open Content Catalog 
	86.	In the categories drop down list choose “Templates” category.
	87.	Choose “URL widget”, drag it into the page and drop wherever you would like.
Define the URL	88.	In the URL widget: in the URL field type the following URL: http://tiny.cc/PMC266-D
	89.	Click +Add device-specific URLs button and type the following iPad URL: http://tiny.cc/PMC266-M
	90.	Click confirm button in the URL widget.
Remove Page Navigation Bar	91.	Click on the site layout icon  in the authoring panel
	92.	Uncheck the check box in order to remove the pages navigation bar.
	93.	Close authoring panel
Set widget in full page mode	94.	Hover over the widget header and click the widget setting button 
	95.	In the settings menu check the „Set as Full Page“ option.
	96.	In the settings menu uncheck the „Display Header Area“ option.
Preview in Mobile	97.	In order to see what your site will look like on tablet device (iPad), click on the iPad preview icon  at the site authoring panel.
	98.	Choose landscape/ portrait view by clicking the orientation icons at the top right corner 
	99.	Close the authoring panel
Rename Site	100.	Double click the site name shown at the top left corner of the site
	101.	Change the site name to be “One Pager 2012”
	102.	Press Enter to apply changes.
Edit Site name in URL	103.	Open settings panel 
	104.	Click the “Edit Site Name in URL” button, and change the URL suffix to be:

“One”.

Publish Site	105.	Still in the Settings panel: Click the Publish button at the bottom of the panel.
	106.	Approve publishing the site in the confirmation dialog.
	107.	Close the dialog says the site is now published.
Invite Users to site	108.	Click on Manage users icon 
	109.	In the opened window click + Invite Users button
	110.	In the invite users dialog add any Email address to send the invitation.

EXERCISE 6: MANAGE THEMES

Go Back to site directory	111.	Click the arrow icon at the bottom of the site authoring panel  , in order to go to site directory.
Navigate to Themes tab	112.	Click on the Themes tab
Download the default theme	113.	Select the Clod portal Theme row.
	114.	Click download button.
	115.	The browser will ask you whether to save or preview the file; choose save option and save the file on Desktop with .css suffix.
Edit CSS file	116.	Open the saved CSS file with any text editor (notepad/notepad++ etc’).
	117.	Search for “site-background” string (ctrl+f).
	118.	Replace the data Uri (in the url property) with the following URL: http://tiny.cc/PMC266-Back
	<i>Note: the default data Uri is a long string.</i>	
Create new Theme	119.	Save your changes.
	120.	Back to Cloud portal, in the Themes tab click + Add Theme button
	121.	In the Add dialog enter the following: <ul style="list-style-type: none">• Name: My new theme• Description: <free text>• Theme Creator: <your name>• CSS file: browse and select the file you edited in the step before.
Enter “My first Cloud site 2012” site	122.	Navigate to site directory tab: click the site directory tab.
	123.	Hover “My First Cloud Site 2012” site and click “Open site for editing” button.
Preview theme	124.	Click on Themes icon  in the site authoring panel.
	125.	In the Theme catalog at the bottom, preview “My new Theme” by clicking it once.
Apply new Theme	126.	Click on Apply Theme button located above the Themes catalog.

127. Close the site authoring panel
 128. See that the site Theme is now different
-

EXERCISE 7: USE ADVANCED SITE MANAGEMENT CAPABILITIES

Change page order	129. Reorder the pages in the pages navigation bar by drag and drop: drag the Welcome page and drop it after the Search page.
Revert Changes	 130. Click on settings icon at the site authoring panel 131. Click “Revert to last published Site”, confirm “Refresh Site” 132. See that Theme changes and pages reorder have been reverted.
Go Back to Site directory	 133. Click the arrow icon at the bottom of the site authoring panel, in order to go to site directory.
Change the tenant default theme	134. Navigate to themes tab, select “My new Theme” row and click on “Set as default” button. 135. The new theme is now the default.
Create new site	136. Navigate to site directory tab 137. Click on  New Site button 138. In the New Site dialog enter the following: <ul style="list-style-type: none"> • Site name: Empty site • Description: <free text> 139. Click “Create and Open” button 140. See the default theme is not the cloud portal default theme; the theme is the new one.
Go Back to Site directory	 141. Click the arrow icon at the bottom of the site authoring panel, in order to go to site directory
Navigate to Content tab	142. In the widgets catalog look for “SAP homepage” widget, select its row. 143. Click on Edit button. 144. In the Edit dialog change the following information: <ul style="list-style-type: none"> • Add another category named “My Category”, separate the two categories by comma. It should look like: Websites, My Category. • Change the widget URL to: http://tiny.cc/ODPortal 145. Click Save
Enter “My first Cloud site 2012” site	146. Navigate to site directory tab: click the site directory tab. 147. Hover “My first Cloud site 2012” site and click “Open site for editing” button.
See the changes	148. In the site Welcome page (the first page) see the widgets inside the group. 149. Click on “SAP Homepage” widget and see its content is now different

150. Open the content catalog , open the categories drop down list and look for the new added category: "My Category", select it.
 151. "SAP Homepage" widget is found in this category (and is the only widget).
-

Take site offline

152. Open site settings by clicking the settings icon 
 153. Click on Take Offline button on the bottom of the panel.
 154. Approve taking the site offline in the confirmation dialog.
 155. Close the message says the site is offline.
-

Delete site

156. Click the arrow icon , in order to go to site directory.
 157. Navigate to site directory tab.
 158. Hover "My first Cloud site 2012" and click the Delete button at the bottom right side of the Site card.
 159. Approve site deletion by clicking the Delete button.
-

Solution:

EXERCISE 1: ADD NEW WIDGETS

The screenshot shows the SAP NetWeaver Cloud Portal interface. The top navigation bar includes 'SAP NetWeaver Cloud Portal' and 'Hello Natali'. The main navigation tabs are 'SITE DIRECTORY', 'CONTENT' (highlighted with a red circle), 'THEMES', and 'ROLES'. Below the navigation, there is a section titled 'Generic Widgets' with a sub-section 'Widgets Available in Content Catalog'. A table lists existing widgets, and a red arrow points to an 'Add Widget' button in the top right corner of the table. Below the table, there is a 'Privacy statement | Terms of use | Legal disclosure' link. At the bottom right of the main content area, there is another 'Add Widget' button. A modal dialog box titled 'Add Widget' is open, showing the following fields:

- *Type: URL (dropdown menu)
- *Name: SAP Homepage
- Description: this is SAP homepage website
- Icon (gif, jpg, png): [empty field] Browse...
- Categories: Websites
- *URL: URL: http://www.sap.com/solutions/technology/cloud/index.epx

At the bottom of the dialog box, there are 'Save' and 'Cancel' buttons. A red arrow points to the 'Save' button.

Name	Description	Categories	Type	URL
Image Widget	A template used to display an image	Templates	OpenSocial	Base/mil/ecm/ecm/image.xml
URL Widget	A template used to display an external web page	Templates	OpenSocial	Base/mil/URL.xml
Document Widget	A template used to display a document	Templates	OpenSocial	Base/mil/ecm/ecm/Doc.xml
Group Widget	A widget used to display a number of related widget	Templates	OpenSocial	Base/mil/group.xml

Add Widget

*Type: OpenSocial

*Name: Publisher

*Role Creator

Save Cancel

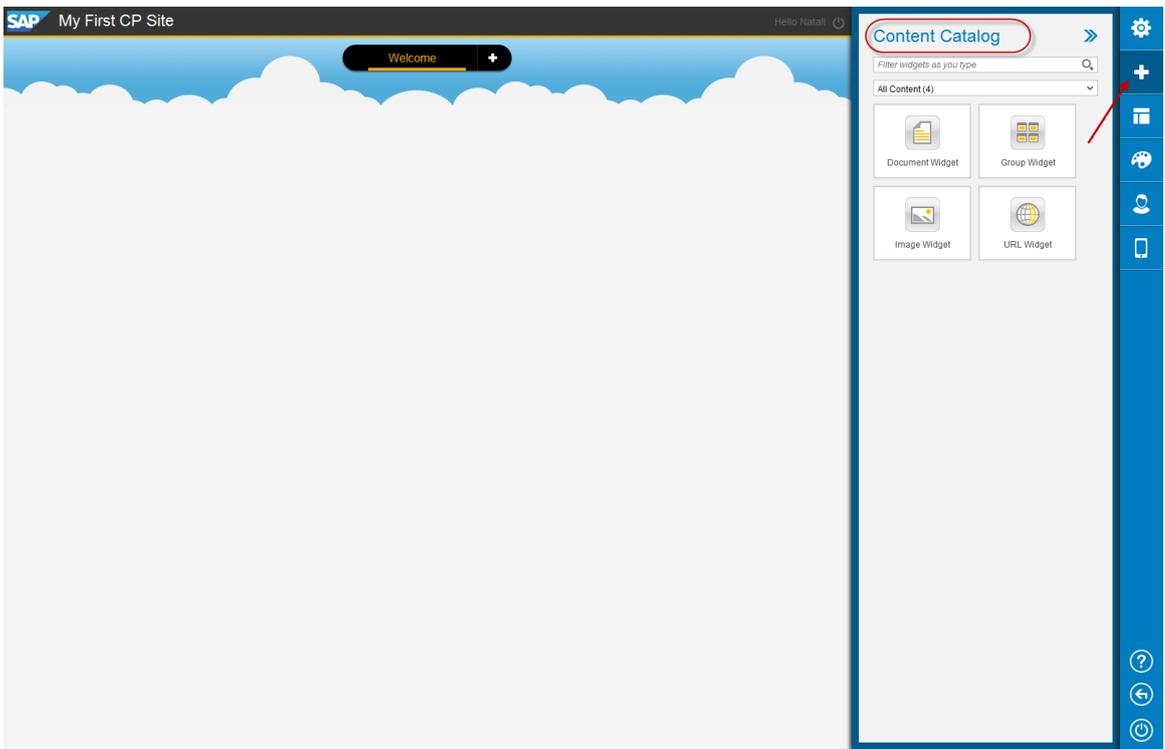

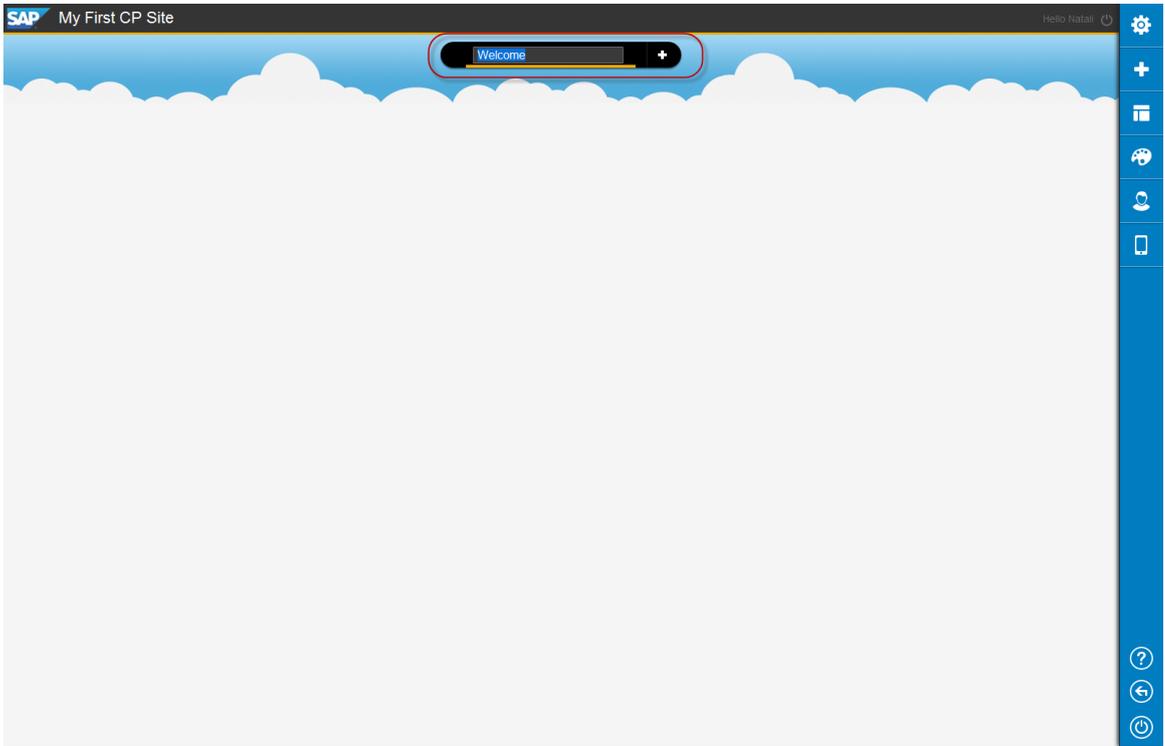

EXERCISE 3: AUTHOR SITE

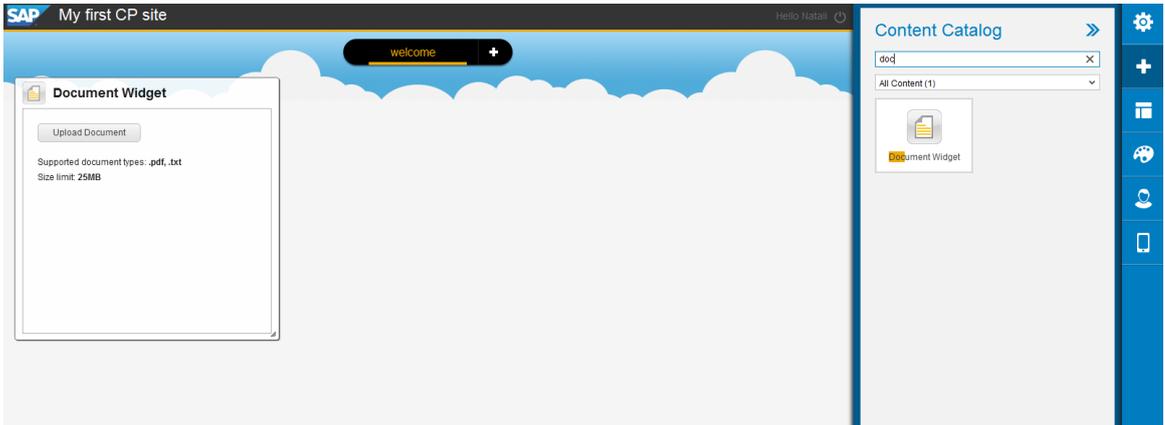

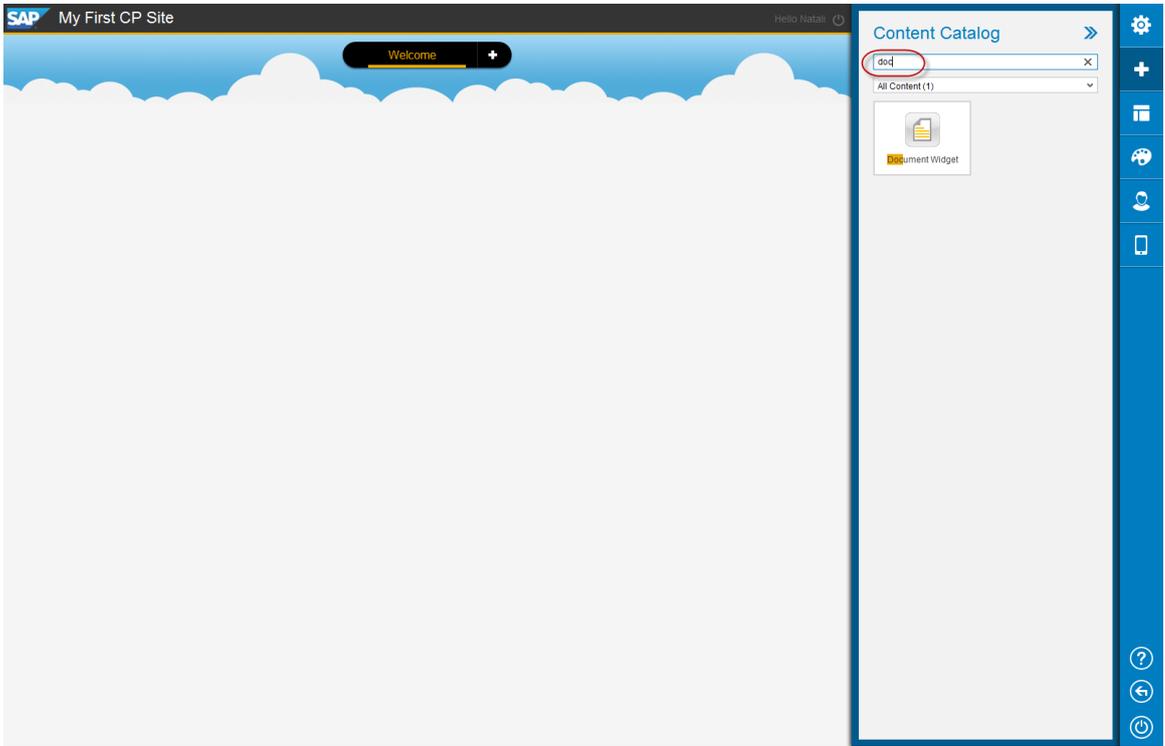

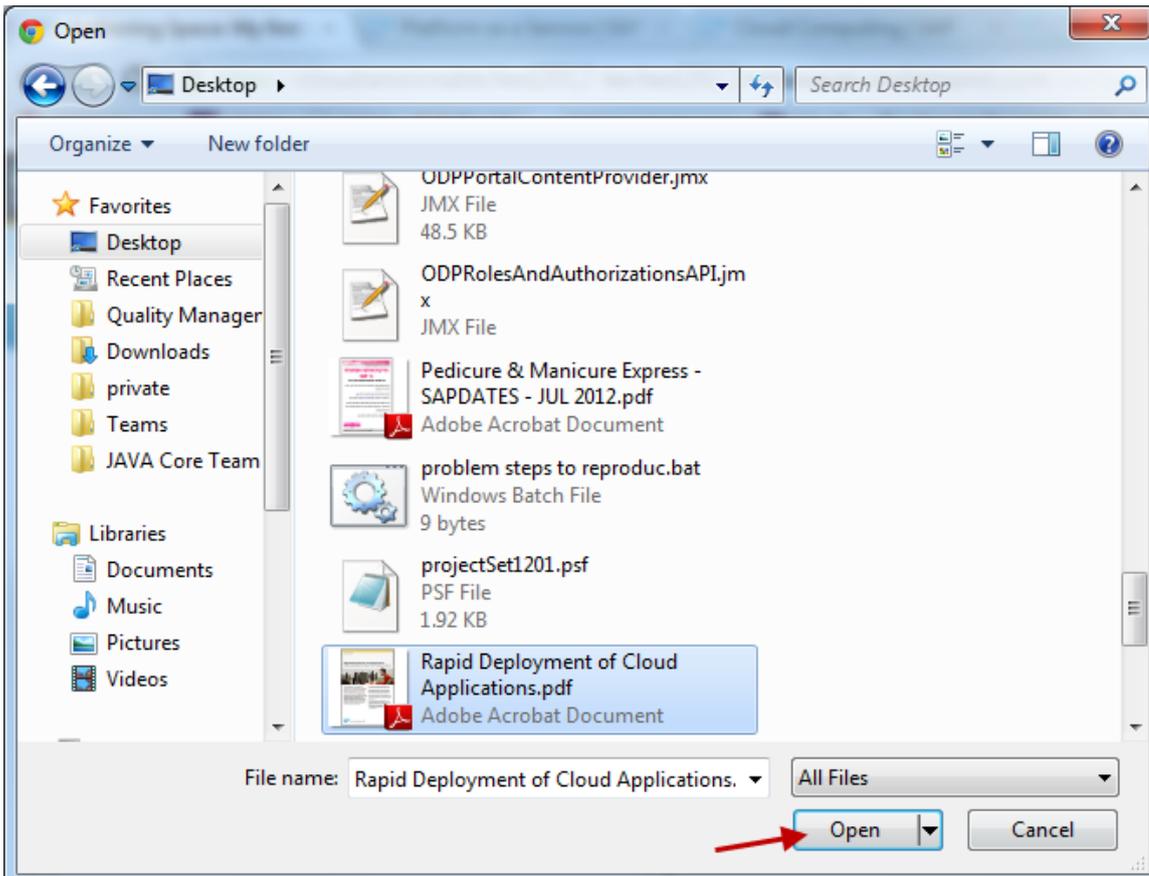

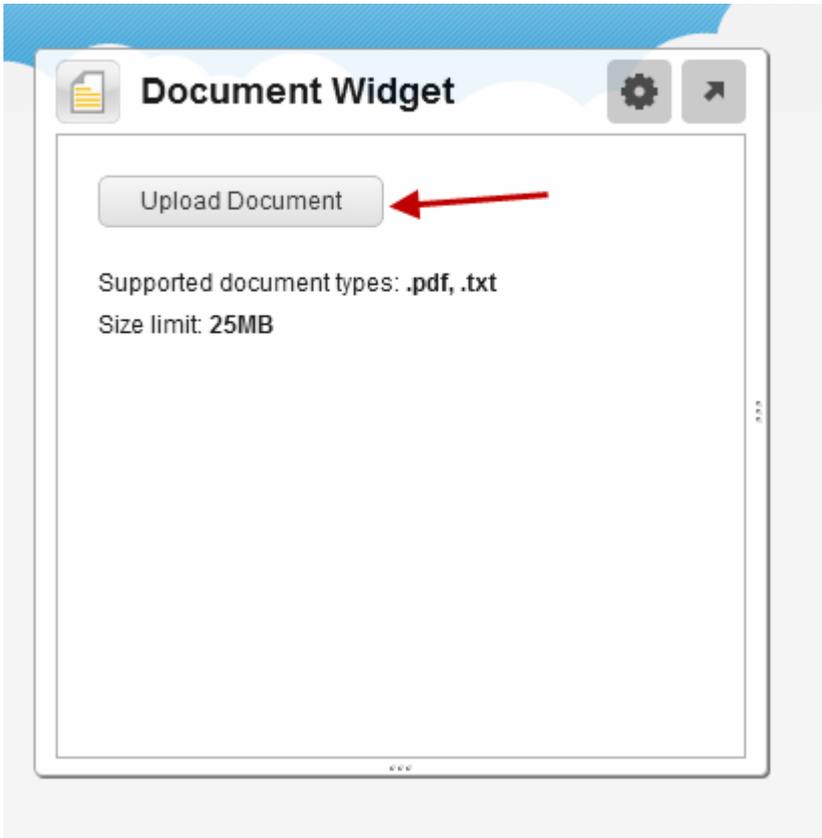

Create a Site in 10 Easy Steps

- 1 Your entry point to the SAP NetWeaver Cloud Portal is the **Site Directory**. This is where you can see all your sites, and create new ones. **Give your site a name** and choose "Open Site for Editing" to go to the **Authoring Space**.
- 2 Now **add pages** to your site by choosing **+** in the page navigation bar. You can **rename pages** or **delete** them, as required. To display the **⚙** menu for accessing the page options, hover the cursor over the page name.
- 3 **Add content to the page**. In the side-panel menu, choose **+** to open the content catalog. This is where you will find all the widgets that you can add to your site. To add a widget to the page, you can either double-click it to add it to the bottom of the page, or drag it from the catalog directly to its position.
- 4 **Finalize the look of your page:**
 - **Move widgets** around on the page to position them. **Resize widgets** by dragging their right or lower side.
 - **Rename widgets** by double-clicking the title and typing a new name.
 - Some widgets on the page may be better viewed in **full-screen mode**. First make sure that there are no other widgets on the page. Then, hover the cursor over the header area of a widget, choose **⚙** to open the Options menu, and choose Set as Full Page.
 - To **remove a widget from the page**, hover the cursor over the header area, choose **⚙** to open the Options menu, and choose "Remove".
- 5 Select a **theme** for the site by choosing **🎨** in the side-panel menu, selecting one of the provided themes, and choosing Apply Theme. When you are satisfied with the site, you can check to see what it will look like on a tablet device. Choose **📱** to **simulate** what the site will look like to an end user.
- 6 **Give your users access to the site** by sending them invitations to use it. Choose **👤** in the side-panel menu, and select Invite Users. Enter the full e-mail addresses of all users to whom you want to grant access, and write a few introductory words about the site that you are inviting them to view.
The invitations will be sent only after you publish the site first time.

welcome

EXERCISE 7: USE ADVANCED SITE MANAGEMENT CAPABILITIES

The screenshot displays the SAP My First Cloud Site 2012 user interface. The top navigation bar includes the SAP logo, the site name "My First Cloud Site 2012", and a user greeting "Hello Vitaly". Below the navigation bar, there are three main content areas:

- Business Information:** A panel for entering business details. It includes a sub-header "Business Information" and a description "Get business details and location directly to you OnDemand Portal site". There are input fields for "Name:" and "Location:".
- Bing Search:** A search widget showing the search term "SAP" and the result "270,000,000 RESULTS".
- Google maps:** A map of the Middle East region, showing Israel, Jordan, and parts of Syria and Iraq. Major cities like Tel Aviv, Jerusalem, Amman, and Petra are labeled.

On the right side, there is a vertical sidebar for site management:

- Settings:** A panel titled "Settings" for "My First Cloud Site 2012". It displays the site URL: `https://cloudsessionateched2012-teched2012.netweaver.ondemand.com/mysite`. Below the URL, there are links for "Edit Site Name in URL", "Access User Site", "Go to user site", and "Display QR code".
- Site Information:** A section showing the site's creation and modification dates and the user responsible for these actions.

Field	Value
Date Created	23.09.2012 03:10
Last Published	Vitaly Vainer, 23.09.2012 03:39
Last Modified	Vitaly Vainer, 23.09.2012 03:57
- Site Status:** A section showing the current status of the site as "Published".
- Management Buttons:** A set of buttons for site management: "Revert to Last Published Site", "Take Offline", and "Publish".

Two red arrows point to the "Revert to Last Published Site" and "Take Offline" buttons, indicating the focus of the exercise.
